i-Timesheets Hosted is a fully-hosted web timesheet solution (accessed via our website – no installation required), which is offered on a monthly or annual subscription basis.

I-TIMESHEETS HOSTED IS IDEAL FOR:

- Businesses preferring to pay for their timesheet solution on a monthly or annual subscription basis, rather than purchasing a product outright.
- Corporations that have a need to track time and manage costs for specific projects, without engaging internal IT resources to set up new systems.
- Businesses wanting to implement a solution quickly and simply.
- Any business looking for a professional and easy-to-use timesheet management system available as a fully hosted solution.

TESTIMONIAL:

"DeMorgan are an information security company, providing both consultancy and managed services to a varied client base. The differences in these two engagement models requires a time capture system that is both versatile and comprehensive, but still provides extensive reporting functionality.

We evaluated i-Timesheets against our own criteria and were pleased with the result. Consequently, we now use i-Timesheets for internal management reporting and for tracking all of our projects, whether for clients or in-house. With i-Timesheets, we can capture and report data in a structure and format that contributes to our own business process improvement initiatives."

Alan Bullows - Managing Director, DeMorgan Information Security Systems
