

Web-based Timesheet Management Solution

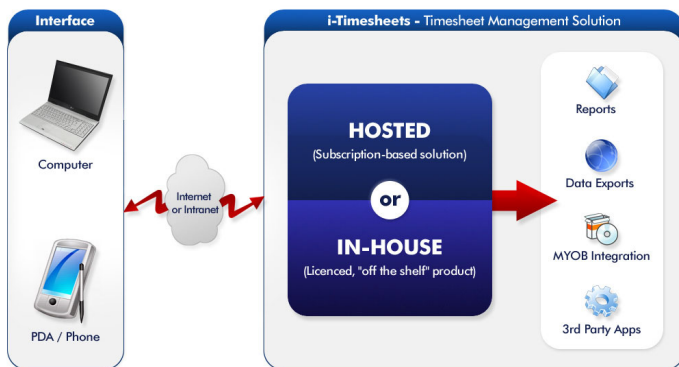

i-Timesheets is an affordable, proven and easy-to-use web-based timesheet management solution that allows you to record and manage time records for your business via the internet or your intranet.

I-TIMESHEETS IS IDEAL FOR:

- Professional Service-based businesses looking to save time any money by streamlining their time recording and administration processes.
- Organisations providing professional services to be charged at an hourly rate.
- Corporations requiring a web-based system to help them track and manage time on large demanding projects.
- Government departments that need to closely monitor contractors and staff working on specific projects.
- Businesses wishing to integrate their time recording with external systems for invoicing and payroll integration.

HOW IT WORKS:

PRODUCTS:

There are three i-Timesheets solutions available:

- **i-Timesheets Hosted** is a fully-hosted web timesheet solution (accessed via our website – no installation required), which is offered on a monthly or annual subscription basis.
- **i-Timesheets In-House** is an "off-the-shelf" product that you purchase and install on your own web server as either an intranet or internet web site.
- **i-Timesheets Custom** is perfect if you are a larger business or corporation looking for a hosted or in-house solution that is more tightly integrated with your other business systems.
